

# Problem 9 : DOB calculator

: 7/10/2024 : 3

## \* IPO:

### Input:

- current year, birth year, current month, birth month, current date, birth date

### Processing:

- IF currentyear  $\leq$  2024 AND birthyear  $\geq$  1924 THEN

Years = currentyear - birthyear

ELSE

PRINT "Invalid Year"

- IF (currentdate  $<$  0 AND currentdate  $\geq$  31) AND (birthdate  $<$  0 AND birthdate  $\geq$  31) THEN

IF (birthmonth == 1) OR (birthmonth == 3) OR

(birthmonth == 5) OR (birthmonth == 7) OR (birthmonth == 9)

OR (birthmonth == 11) THEN

IF birthmonth  $>$  currentmonth THEN

Days = birthdate - currentdate

ELSEIF birthmonth == currentmonth THEN

Days = 0

ELSE

Days = 31 - (currentdate - birthdate).

ENDIF

ELSEIF (birthmonth == 4) AND (birthmonth == 6) AND

(birthmonth == 8) AND (birthmonth == 10) AND

(birthmonth == 12) THEN.

Date: .....

IF birthmonth > currentmonth THEN

Days = birthdate - currentdate

ELSEIF birthmonth == currentmonth THEN

Days = 0

*Birthdate*

ELSE

Days = 30 - (currentdate - birthdate)

ENDIF

ELSEIF birthmonth == 2 THEN

IF birthmonth > currentmonth THEN

Days = birthmonth - currentmonth

ELSEIF birthmonth == currentmonth THEN

Days = 0

ELSE

Days = 28 - (currentdate - birthdate)

ELSE

PRINT "Error"

• IF (currentmonth < 0 AND currentmonth > 13) AND (birthmonth < 0 AND birthmonth > 13) THEN

IF birthmonth > currentmonth THEN

Month = birthmonth - currentmonth

ELSEIF birthmonth == currentmonth THEN

Month = 0

ELSE

Month = 12 - (currentmonth - birthmonth)

ELSE

PRINT "Error"

Output :

- age in years, months and days.
